SOIL BIOLOGY AND BIOCHEMISTRY

Cooperating Journal of the International Union of Soil Sciences

AIMS AND SCOPE

AIMS

Soil Biology & Biochemistry is intended to act as an organ of research on soil organisms, their biochemical activities and their influence on the soil environment and plant growth. It publishes original work on quantitative, analytical and experimental aspects of such research. Soil biology and soil biochemistry cover many scientific disciplines but a single journal brings together the results and views of research workers working in a wide variety of research areas.

SCOPE

The scope of this journal is wide and embraces accounts of original research on the biology, ecology and biochemical activities of all forms of life that exist in the soil environment. In the context of the soil environment, subjects which have proved to be prominent or are receiving increasing attention include:

microbial biomass and soil fertility
soil organisms and sustainable agriculture
biology of earthworms and other soil animals
biology and biochemistry of decomposition
soil enzymes
mycorrhiza
biological nitrogen fixation
biological nutrient transformations and cycling
modelling of biological processes
biology and biochemistry of contaminated soils
waste disposal
bioremediation
biodegradation of xenobiotics
soil-borne plant pathogens
biological control of organisms
genetically-engineered microorganisms (GEMS) or plants.

Among the criteria for publication are the intrinsic interest and the scientific value of the work described. Authors are encouraged to evaluate both the fundamental and the applied aspects of their topic, and, where possible, to show how they are interrelated.

Original papers, not published previously, are welcomed from all parts of the world. The contributions also include Short Communications concerned with modern experimentation, techniques, equipment and significant observations. Papers are accepted that present a new theory, provide a state-of-the-art review or comment upon some controversial topic area relevant to the journal. Book reviews are published.

EDITOR-IN-CHIEF

PROFESSOR J. S. WAID, P.O. Box 760, Buderim, Queensland 4556, Australia: *Fax* +61 (754) 769 183: *E-mail* jswaid@optusnet.com.au

CHIEF EDITORS

PROFESSOR J. M. ANDERSON, Department of Biological Sciences, University of Exeter, Prince of Wales Road, Exeter EX4 4PS, UK: *Fax* +44 (0) 1392 263700: *E-mail* j.m.anderson@exeter.ac.uk

PROFESSOR R. G. BURNS, Department of Biosciences, University of Kent, Canterbury, Kent CT2 7NJ, UK: *Fax* +44 (0) 1227 763 912: *E-mail* r.g.burns@ukc.ac.uk

PROFESSOR D. C. COLEMAN, Institute of Ecology, Ecology Annex, University of Georgia, Athens, GA 30602-2360, U.S.A.: *Fax* +1 (706) 583 0646: *E-mail* coleman@sparc.ecology.uga.edu

BOARD OF SUBJECT EDITORS

DR G. ALMENDROS MARTIN, Centro de Ciencias Medioambientales (C.S.I.C.), Madrid, Spain.

PROFESSOR H. ANTOUN, Université Laval Ste-Foy (Québec), Canada.

DR E. BÅÅTH, Lund University, Lund, Sweden.

DR. G. H. BAKER, CSIRO, Canberra, Australia.

DR. L. R. BAKKEN, Agricultural University of Norway, Aas, Norway.

PROFESSOR R. D. BARDGETT, Lancaster University, Lancaster, UK.

DR. R. M. BODDEY, Estrada Antiga Rio-São Paulo, Rio de Janeiro, Brazil.

DR T. BOLGER, University College Dublin, Dublin, Ireland.

DR. R. D. BOONE, University of Alaska Fairbanks, Fairbanks, U.S.A.

DR M.-M. COÛTEAUX, Centre d'Ecologie Fonctionnelle et Evolutive, France.

PROFESSOR J. DIGHTON, Rutgers University, Camden, U.S.A.

DR. O. DILLY, Universität Kiel, Kiel, Germany.

PROFESSOR R. A. DRIJBER, University of Nebraska-Lincoln, Lincoln, U.S.A.

DR A. GANGE, University of London, Surrey, UK.

PROFESSOR K. E. GILLER, Wageningen University, Wageningen, The Netherlands.

DR K. W. T. GOULDING, ICAR-Rothamsted, Harpenden, UK.

PROFESSOR R. GRANT, University of Alberta, Edmonton, Canada.

DR L. GREENFIELD, University of Canterbury, Christchurch, New Zealand.

DR G. GUGGENBERGER, University of Bayreuth, Bayreuth, Germany.

DR V. V. S. R. GUPTA, CSIRO Land and Water, Glen Osmond, South Australia.

PROFESSOR T. HATTORI, Sendai, Japan.

PROFESSOR D. W. HOPKINS, University of Stirling, Stirling, UK.

PROFESSOR S. C. JARVIS, Institute of Grassland & Environmental Research, Okehampton, UK.

PROFESSOR R. G. JOERGENSEN, University of Kassel, Witzenhausen, Germany.

PROFESSOR M. KIMURA, Nagoya University, Nagoya, Japan.

PROFESSOR I. KOEGEL-KNABNER, TU Munich, Freising-Weihenstephan, Germany.

PROFESSOR K. J. NADELFOFFER, University of Michigan, Ann Arbor, U.S.A.

PROFESSOR A. G. O'DONNELL, University of Newcastle Upon Tyne, Newcastle Upon Tyne, UK.

PROFESSOR K. RITZ, National Soil Resources Institute, Cranfield University, Silsoe, UK.

DR C. H. ROBINSON, University of London, London, UK.

PROFESSOR DR S. SCHEU, Technische Universitaet Darmstadt, Darmstadt, Germany.

PROFESSOR J. SCHIMEL, University of California, Santa Barbara, U.S.A.

PROFESSOR K. M. SCOW, University of California, Davis, U.S.A.

PROFESSOR T. R. SEASTEDT, University of Colorado, Boulder, U.S.A.

DR K. T. SEMPLE, Lancaster University, Lancaster, UK.

PROFESSOR K. SIVASITHAMPARAM, University of Western Australia, Crawley, Australia.

DR J. SIX, University of California, Davis, U.S.A.

DR J. L. SMITH, USDA-ARS, Washington State University, Pullman, U.S.A.

DR T. W. SPEIR, Institute of Environmental Science and Research Ltd., Porirua, New Zealand.

PROFESSOR G. STOTZKY, New York University, New York, U.S.A.

DR IAN THOMPSON, NERC CEH-Oxford, Virology & Environmental Microbiology, Oxford, UK.

DR G. TIAN, University of Georgia, Athens, U.S.A.

DR S. VISSER, The University of Calgary, Alberta, Canada.

DR M. WOOD, University of Reading, Reading, U.K.

PROFESSOR J. C. ZAK, Texas Technical University, Lubbock, U.S.A.

DR XIAOMING ZOU, Xishuangbanna Tropical Botanical Garden, Yunnan, People's Republic of China.

CONTENTS

Volume 35 Number 1

A. Fey and R. Conrad	1	Effect of temperature on the rate limiting step in the methanogenic degradation pathway in rice field soil
S.-K. Chen, C. A. Edwards and S. Subler	9	The influence of two agricultural biostimulants on nitrogen transformations, microbial activity, and plant growth in soil microcosms
J. Mayer, F. Buegger, E. S. Jensen, M. Schloter and J. Heß	21	Estimating N rhizodeposition of grain legumes using a ^{15}N in situ stem labelling method
M. Burger and L. E. Jackson	29	Microbial immobilization of ammonium and nitrate in relation to ammonification and nitrification rates in organic and conventional cropping systems
M. Pansu and L. Thuriès	37	Kinetics of C and N mineralization, N immobilization and N volatilization of organic inputs in soil
I. V. Castro, E. M. Ferreira and S. P. McGrath	49	Survival and plasmid stability of rhizobia introduced into a contaminated soil
E. Gamalero, L. Fracchia, M. Cavaletto, J. Garbaye, P. Frey-Klett, G. C. Varese and M. G. Martinotti	55	Characterization of functional traits of two fluorescent pseudomonads isolated from basidiomes of ectomycorrhizal fungi
S. Bruun, B. T. Christensen, E. M. Hansen, J. Magid and L. S. Jensen	67	Calibration and validation of the soil organic matter dynamics of the *Daisy* model with data from the Askov long-term experiments
V. R. Smith	77	Soil respiration and its determinants on a sub-Antarctic island
V. Gaillard, C. Chenu and S. Recous	93	Carbon mineralisation in soil adjacent to plant residues of contrasting biochemical quality
R. Kiem and I. Kögel-Knabner	101	Contribution of lignin and polysaccharides to the refractory carbon pool in C-depleted arable soils
M. Holmstrup and V. Loeschcke	119	Genetic variation in desiccation tolerance of *Dendrobaena octaedra* cocoons originating from different climatic regions
M. G. Vijver, J. P. M. Vink, C. J. H. Miermans and C. A. M. van Gestel	125	Oral sealing using glue: a new method to distinguish between intestinal and dermal uptake of metals in earthworms
E. Martino, S. Perotto, R. Parsons and G. M. Gadd	133	Solubilization of insoluble inorganic zinc compounds by ericoid mycorrhizal fungi derived from heavy metal polluted sites
G. Bengtsson, P. Bengtson and K. F. Månsson	143	Gross nitrogen mineralization-, immobilization-, and nitrification rates as a function of soil C/N ratio and microbial activity
W. Rosenberg, K. G.J. Nierop, H. Knicker, P. A. de Jager, K. Kreutzer and T. Weiß	155	Liming effects on the chemical composition of the organic surface layer of a mature Norway spruce stand (*Picea abies* [L.] Karst.)
N. Fierer, J. P. Schimel and P. A. Holden	167	Variations in microbial community composition through two soil depth profiles
J. Mackensen and J. Bauhus	177	Density loss and respiration rates in coarse woody debris of *Pinus radiata*, *Eucalyptus regnans* and *Eucalyptus maculata*
B. L. Turner, J. P. Driessen, P. M. Haygarth and I. D. Mckelvie	187	Potential contribution of lysed bacterial cells to phosphorus solubilisation in two rewetted Australian pasture soils
P. D. Steinberg and M. C. Rillig	191	Differential decomposition of arbuscular mycorrhizal fungal hyphae and glomalin
	195	Letter to the Editor
	197	Erratum: "N-pool in volcanic ash-derived soils in Chile and its changes in deforested sites" by G. Borie, P. Peirano, H. Zunino, S.M. Aguilera [Soil Biology & Biochemistry 34 (8) (2002) 1201–1206]

Volume 35 Number 2

T. B. Kinraide and B. K. Sweeney	199	Proton alleviation of growth inhibition by toxic metals (Al, La, Cu) in rhizobia
A. B. Kwabiah, C. A. Palm, N. C. Stoskopf and R. P. Voroney	207	Response of soil microbial biomass dynamics to quality of plant materials with emphasis on P availability
E. Uhlířová and H. Šantrůčková	217	Growth rate of bacteria is affected by soil texture and extraction procedure
R. F. Grant and E. Pattey	225	Modelling variability in N_2O emissions from fertilized agricultural fields
P. Rovira and V. R. Vallejo	245	Physical protection and biochemical quality of organic matter in mediterranean calcareous forest soils: a density fractionation approach
B. Elberling and K. K. Brandt	263	Uncoupling of microbial CO_2 production and release in frozen soil and its implications for field studies of arctic C cycling
W. J. Wang, R. C. Dalal, P. W. Moody and C. J. Smith	273	Relationships of soil respiration to microbial biomass, substrate availability and clay content
C. Müller, R. J. Stevens and R. J. Laughlin	285	Evidence of carbon stimulated N transformations in grassland soil after slurry application
H. I. Chaoui, L. M. Zibilske and T. Ohno	295	Effects of earthworm casts and compost on soil microbial activity and plant nutrient availability
E. A. Hobbie, L. S. Watrud, S. Maggard, T. Shiroyama and P. T. Rygiewicz	303	Carbohydrate use and assimilation by litter and soil fungi assessed by carbon isotopes and BIOLOG® assays
T. Jager, R. H.-L. J. Fleuren, W. Roelofs and A. C. de Groot	313	Feeding activity of the earthworm *Eisenia andrei* in artificial soil
M. Kamensky, M. Ovadis, I. Chet and L. Chernin	323	Soil-borne strain IC14 of *Serratia plymuthica* with multiple mechanisms of antifungal activity provides biocontrol of *Botrytis cinerea* and *Sclerotinia sclerotiorum* diseases
Z. Zhong and F. Makeschin	333	Soluble organic nitrogen in temperate forest soils
C. H. Ettema and G. W. Yeates	339	Nested spatial biodiversity patterns of nematode genera in a New Zealand forest and pasture soil
A. B. Frank, M. A. Liebig and J. D. Hanson	343	Erratum: "Soil carbon dioxide fluxes in northern semiarid grasslands" [Soil Biology & Biochemistry 34 (9) (2002) 1235–1241]

Volume 35 Number 3

R. A. Chimner and D. J. Cooper	345	Influence of water table levels on CO_2 emissions in a Colorado subalpine fen: an in situ microcosm study
M. Pansu, L. Thuriès, M. C. Larré-Larrouy and P. Bottner	353	Predicting N transformations from organic inputs in soil in relation to incubation time and biochemical composition
A. Roy and K. P. Singh	365	Dynamics of microbial biomass and nitrogen supply during primary succession on blastfurnace slag dumps in dry tropics
L. V. Gonod, C. Chenu and G. Soulas	373	Spatial variability of 2,4-dichlorophenoxyacetic acid (2,4-D) mineralisation potential at a millimetre scale in soil
A. Saari and P. J. Martikainen	383	Dimethyl sulphoxide (DMSO) and dimethyl sulphide (DMS) as inhibitors of methane oxidation in forest soil
T. Sariyildiz and J.-M. Anderson	391	Interactions between litter quality, decomposition and soil fertility: a laboratory study
P. R. Hargreaves, P. C. Brookes, G. J. S. Ross and P. R. Poulton	401	Evaluating soil microbial biomass carbon as an indicator of long-term environmental change
E. E. Jones, A. Mead and J. M. Whipps	409	Evaluation of different *Coniothyrium minitans* inoculum sources and application rates on apothecial production and infection of *Sclerotinia sclerotiorum* sclerotia

P. L. Staddon, N. Ostle and A. H. Fitter 421 Earthworm extraction by electroshocking does not affect canopy CO_2 exchange, root respiration, mycorrhizal fungal abundance or mycorrhizal fungal vitality

Z.-P. Wang and P. Ineson 427 Methane oxidation in a temperate coniferous forest soil: effects of inorganic N

M. R. Ashman, P. D. Hallett and P. C. Brookes 435 Are the links between soil aggregate size class, soil organic matter and respiration rate artefacts of the fractionation procedure

A. Rumberger and P. Marschner 445 2-Phenylethylisothiocyanate concentration and microbial community composition in the rhizosphere of canola

P. Marschner, E. Kandeler and B. Marschner 453 Structure and function of the soil microbial community in a long-term fertilizer experiment

M. Ros, M. T. Hernandez and C. García 463 Soil microbial activity after restoration of a semiarid soil by organic amendments

L. J. C. Xavier and J. J. Germida 471 Bacteria associated with *Glomus clarum* spores influence mycorrhizal activity

G. C. Roberts, F. Peurou and A. J. Penwell 479 Assessing the toxic effect of nitrapyrin on nitrogen transformation in soil

W.-J. Choi and H.-M. Ro 483 Differences in isotopic fractionation of nitrogen in water-saturated and unsaturated soils

G. Renella, A. L.R. Ortigoza, L. Landi and P. Nannipieri	1203	Additive effects of copper and zinc on cadmium toxicity on phosphatase activities and ATP content of soil as estimated by the ecological dose (ED_{50})
T. Chevallier, P. Muchaonyerwa and C. Chenu	1211	Microbial utilisation of two proteins adsorbed to a vertisol clay fraction: toxin from *bacillus thuringiensis* subsp. *tenebrionis* and bovine serum albumin
L. V. Verchot, P. R. Moutinho and E. A. Davidson	1219	Leaf-cutting ant (*Atta Sexdens*) and nutrient cycling: deep soil inorganic nitrogen stocks, mineralization, and nitrification in Eastern Amazonia
Y. Lu, A. Watanabe and M. Kimura	1223	Carbon dynamics of rhizodeposits, root- and shoot-residues in a rice soil
A. Ghani, M. Dexter and K. W. Perrott	1231	Hot-water extractable carbon in soils: a sensitive measurement for determining impacts of fertilisation, grazing and cultivation
C. B. Blackwood and E. A. Paul	1245	Eubacterial community structure and population size within the soil light fraction, rhizosphere, and heavy fraction of several agricultural systems
M. C. Rillig, F. T. Maestre and L. J. Lamit	1257	Microsite differences in fungal hyphal length, glomalin, and soil aggregate stability in semiarid Mediterranean steppes
W. J. Jung, K. N. An, Y. L. Jin, R. D. Park, K. T. Lim, K. Y. Kim and T. H. Kim	1261	Biological control of damping-off caused by *Rhizoctonia solani* using chitinase-producing *Paenibacillus illinoisensis* KJA-424
J. K. Whalen and H. H. Janzen	1265	Isotopic labelling of earthworms: response to comments by Schmidt et al. (2003)

Volume 35 Number 10

	1267	Publisher's note
T. Knacker, Bernhard Förster, J. Römbke and G.K. Frampton	1269	Assessing the effects of plant protection products on organic matter breakdown in arable fields—litter decomposition test systems
W.-J. Choi, H.-M. Ro and S.-M. Lee	1289	Natural ^{15}N abundances of inorganic nitrogen in soil treated with fertilizer and compost under changing soil moisture regimes
E. Zaady, P.M. Groffman, M. Shachak and A. Wilby	1299	Consumption and release of nitrogen by the harvester termite *Anacanthotermes ubachi* navas in the northern Negev desert, Israel
G. Sjöberg, B. Bergkvist, D. Berggren and S.I. Nilsson	1305	Long-term N addition effects on the C mineralization and DOC production in mor humus under spruce
G.S. Toor, L.M. Condron, H.J. Di, K.C. Cameron and B. J. Cade-Menum	1317	Characterization of organic phosphorus in leachate from a grassland soil
M. Richter, U.A. Hartwig, E. Frossard, J. Nösberger and G. Cadisch	1325	Gross fluxes of nitrogen in grassland soil exposed to elevated atmospheric pCO_2 for seven years
J.S.K. Bäckman, A. Hermansson, C.C. Tebbe and P.-E. Lindgren	1337	Liming induces growth of a diverse flora of ammonia-oxidising bacteria in acid spruce forest soil as determined by SSCP and DGGE
C. Wamberg, S. Christensen, I. Jakobsen, A.K. Müller and S.J. Sørensen	1349	The mycorrhizal fungus (*Glomus intraradices*) affects microbial activity in the rhizosphere of pea plants (*Pisum sativum*)

I.A. Siddiqui and S.S. Shaukat	1359	Effects of Pseudomonas aeruginosa on the diversity of culturable microfungi and nematodes associated with
Y. Ma, N.M. Dickinson and M.H. Wong	1369	Interactions between earthworms, trees, soil nutrition and metal mobility in amended Pb/Zn mine tailings from Guangdong, China
S. Stark and M. Hyvärinen	1381	Are phenolics leaching from the lichen *Cladina Stellaris* sources of energy rather than allelopathic agents for soil microorganisms?
M. Maraun, J.-A. Salamon, K. Schneider, M. Schaefer and S. Scheu	1387	Oribatid mite and collembolan diversity, density and community structure in a moder beech forest (*Fagus sylvatica*): effects of mechanical perturbations
S.J. González-Prieto and M.C. Villar	1395	Soil organic N dynamics and stand quality in *Pinus radiata* pinewoods of the temperate humid region
R. Miethling, K. Ahrends and C.C. Tebbe	1405	Structural differences in the rhizosphere communities of legumes are not equally reflected in community-level physiological profiles

Volume 35 Number 11

R. Bol, E. Kandeler, W. Amelung, B. Glaser, M. C. Marx, N. Preedy and K. Lorenz	1411	Short-term effects of dairy slurry amendment on carbon sequestration and enzyme activities in a temperate grassland
T. Osono, Y. Ono and H. Takeda	1423	Fungal ingrowth on forest floor and decomposing needle litter of *Chamaecyparis obtusa* in relation to resource availability and moisture condition
M. E. Koivunen, C. Morisseau, J. W. Newman, W. R. Horwath and B. D. Hammock	1433	Purification and characterization of a methylene urea-hydrolyzing enzyme from *Rhizobium radiobacter* (*Agrobacterium tumefaciens*)
C. J. A. Macleod and K. T. Semple	1443	Sequential extraction of low concentrations of pyrene and formation of non-extractable residues in sterile and non-sterile soils
R. P. Larkin	1451	Characterization of soil microbial communities under different potato cropping systems by microbial population dynamics, substrate utilization, and fatty acid profiles
J.-A. Subke, M. Reichstein and J. D. Tenhunen	1467	Explaining temporal variation in soil CO_2 efflux in a mature spruce forest in Southern Germany
J. Dyckmans, K. Chander, R. G. Joergensen, J. Priess, M. Raubuch and U. Sehy	1485	Adenylates as an estimate of microbial biomass C in different soil groups
W.-J. Choi, H.-M. Ro and E. A. Hobbie	1493	Patterns of natural ^{15}N in soils and plants from chemically and organically fertilized uplands
J. Horswell, T. W. Speir and A. P. van Schaik	1501	Bio-indicators to assess impacts of heavy metals in land-applied sewage sludge
F. Ekelund, S. Olsson and A. Johansen	1507	Changes in the succession and diversity of protozoan and microbial populations in soil spiked with a range of copper concentrations
J. Perkiömäki, A. Tom-Petersen, O. Nybroe and H. Fritze	1517	Boreal forest microbial community after long-term field exposure to acid and metal pollution and its potential remediation by using wood ash

Volume 35 Number 12

A. M. O'Connell, T. S. Grove, D. S. Mendham and S. J. Rance	1527	Changes in soil N status and N supply rates in agricultural land afforested with eucalypts in south-western Australia
A. Dechesne, C. Pallud, D. Debouzie, J. P. Flandrois, T. M. Vogel, J. P. Gaudet and G. L. Grundmann	1537	A novel method for characterizing the microscale 3D spatial distribution of bacteria in soil
D. R. Singleton, P. F. Hendrix, D. C. Coleman and W. B. Whitman	1547	Identification of uncultured bacteria tightly associated with the intestine of the earthworm *Lumbricus rubellus* (Lumbricidae; Oligochaeta)

I. M. van Aarle, B. Söderström and P. A. Olsson	1557	Growth and interactions of arbuscular mycorrhizal fungi in soils from limestone and acid rock habitats
A. J. Bennett, C. Leifert and J. M. Whipps	1565	Survival of the biocontrol agents *Coniothyrium minitans* and *Bacillus subtilis* MBI 600 introduced into pasteurised, sterilised and non-sterile soils
G. Sparling, D. Ross, N. Trustrum, G. Arnold, A. West, T. Speir and L. Schipper	1575	Recovery of topsoil characteristics after landslip erosion in dry hill country of New Zealand, and a test of the space-for-time hypothesis
M.-M. Coûteaux, B. Berg and P. Rovira	1587	Near infrared reflectance spectroscopy for determination of organic matter fractions including microbial biomass in coniferous forest soils
H. Okada and I. Kadota	1601	Host status of 10 fungal isolates for two nematode species, *Filenchus misellus* and *Aphelenchus avenae*
N. I. López, A. T. Austin, O. E. Sala and B. S. Méndez	1609	Controls on nitrification in a water-limited ecosystem: experimental inhibition of ammonia-oxidising bacteria in the Patagonian steppe
I. A. Siddiqui and S. Shahid Shaukat	1615	Suppression of root-knot disease by *Pseudomonas fluorescens* CHA0 in tomato: importance of bacterial secondary metabolite, 2,4-diacetylpholoroglucinol
I. A. Siddiqui, S. S. Shaukat, G. H. Khan and N. I. Ali	1625	Suppression of *Meloidogyne javanica* by *Pseudomonas aeruginosa* IE-6S$^+$ in tomato: the influence of NaCl, oxygen and iron levels
C. Vettori, D. Paffetti, D. Saxena, G. Stotzky and R. Giannini	1635	Persistence of toxins and cells of *Bacillus thuringiensis* subsp. *kurstaki* introduced in sprays to Sardinia soils
M. Kerek, R. A. Drijber and R. E. Gaussoin	1643	Labile soil organic matter as a potential nitrogen source in golf greens
P.-C. Vong, O. Dedourge, F. Lasserre-Joulin and A. Guckert	1651	Immobilized-S, microbial biomass-S and soil arylsulfatase activity in the rhizosphere soil of rape and barley as affected by labile substrate C and N additions
M. Catherine Eimers, P. J. Dillon, S. L. Schiff and D. S. Jeffries	1663	The effects of drying and re-wetting and increased temperature on sulphate release from upland and wetland material
M. B. Jenkins	1675	Rhizobial and bradyrhizobial symbionts of mesquite from the Sonoran Desert: salt tolerance, facultative halophily and nitrate respiration
F. Hagedorn, D. Spinnler and R. Siegwolf	1683	Increased N deposition retards mineralization of old soil organic matter
Y. Feng, A. C. Motta, D. W. Reeves, C. H. Burmester, E. van Santen and J. A. Osborne	1693	Soil microbial communities under conventional-till and no-till continuous cotton systems
Short Communication		
D. J. Ross, K. R. Tate, P. C.D. Newton and H. Clark	1705	Carbon mineralization in an organic soil, with and without added grass litter, from a high-CO_2 environment at a carbon dioxide spring
